

Monday May 13 ---Pletcher - Math primarily

8:50-9:30 Period 2 ROCK room

Student 1 works on Odysseyware by herself.

Student 2 is in every other day and today she is mostly likely out for another class

Student 3 is working on GEOMETRY for final exam

She has an online assignment to complete. She will be using her notes. She should check google classroom and bigideasmath.com

Student 4 will need some direction and monitoring.

- 1) Her Geometry work is to practice using the sheet I left Mrs. "Younkin. She is working on volume.
- 2) Her Algebra work is to practice the formulas solving in Geometry. I will have a post on google classroom for her to complete in the afternoon.
- 3) When she is finished then she can work on her **business math** odysseyware assignments.

9:33-10:13 Period 3 Geometry College Prep 18 students

- 1) These students completing a packet of practice work on the angles to arcs of a circle.

They need to **hand this packet in at the end of the period** so I can record it as a grade on completion. If they do not have it finished, let them hand it in at the end of the day **BUT MARK it with the time** to turn it in. I left a copy of the packet on my desk I am using with all Geometry period classes. This class is ahead by 3 days of the other 2 classes so they should have it completed.

2) Complete the online bigideasmath.com assignment posted as 10.5. They need to complete a WORK paper to hand in on these questions. It will be collected tomorrow at the start of class.

They may work together on this and use their notes and formula sheet.
I have a POST in GOOGLE Classroom also to remind them.

10:16-10:56 Period 4 Geometry w/ Mrs. Kroon w/ 18 students

Students have 2 page sides to complete in their practice packet AND 1 assignment online bigideasmath.com from their textbook:

- 10.4 Practice A which is page 5 top side # 1-9
- Kuta Inscribed Angles which is page. 7 top side #1-8
- Online 10.4 and must have a work paper to show the formula that they used.

They may work together on this and use their notes and formula sheet.
They can finish for homework.
I have a POST in GOOGLE Classroom also to remind them.

10:59-11:39 Period 5 Geometry w/ 9 students with Mr. Formica

Same as period 4

11:42-12:22 Period 6 Studyhall in LIBRARY DAY AAAAAAAAAA

1:38-2:18 Period 8 Math 7 Strategies with 9 students

I have a POST in GOOGLE Classroom also to remind them to check as I posted the answers to our Friday activity

1) From Friday Activity --- individually complete the last page "REvisit" questions. This is a test so they need to hand it in when completed but they may use the classroom page answers and their notes but no other site or person.

2) They need to pick cards from the MATH 24 box I left. They will write answers to the problems onto a piece of paper to submit for credit. I posted some requirements like no more than 5 cards front and back that just are whole numbers, then no more than 3 cards with fractions, no more than 3 cards with decimals. IF they get 11 cards (22 cards) completed in one period they are finished.

No tutoring today 9th period or afterschool
Tuesday will resume tutoring opportunities
