School District Areas of Improvement and Planning - Monitoring

District has completed all monitoring corrective action/improvement plans.

Identification Method

Identify the District's method for identifying students with specific learning disabilities

Discrepancy Model

Building Name	AUN	Branch Number	RTI	Approved RTI Use
---------------	-----	---------------	-----	------------------

Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

Under Section 1306 of the Pennsylvania School Code, the host school district (where the facility is located), is responsible for providing the educational program for students, including students with disabilities, who are placed in that facility, and for ensuring the provision of a "free appropriate public education" for eligible children with Individualized Education Programs in accordance with the Individuals with Disabilities Education Act and for "qualified handicapped students" with Service Agreements in accordance with the Rehabilitation Act of 1973 and 22 PA Code Chapter 15. For a child with a disability with an IEP or Service Agreement, when not prohibited by court order, the host district must consider the educational placement options to educate the student in the host district's public schools. If through the IEP or Service Agreement process, the host district and parent determine that an alternative educational setting will more appropriately address the student's educational needs, the host school district is responsible for providing the student with a free and appropriate public education and any needed special services consistent with 22 PA Code Chapter 13 and the IDEA or with the 22 PA Code Chapter 15 and 504 of the Rehabilitation Act. For students eligible for services under Chapter 14, this means the host school district is responsible for making decisions regarding IEP goals, specially designed instruction, and educational placement for each student through the IEP team process. The host district is responsible for monitoring the educational progress and reviewing educational services for the student on a continuous basis and as often as report cards are issued. The host district is also responsible for maintaining contact with the resident school district with respect to the student's placement and progress. Similarly, the host district is responsible for conferring or meeting with the parents and for developing a Service Agreement for a "qualified handicapped student" pursuant to Chapter 15. In addition to ensuring that an appropriate educational program is provided, the host district has Child Find obligations for children thought to be eligible for special education services and/or accommodations within the host district's jurisdiction. The responsibility includes locating and evaluating all Section 13-6 students with suspected disabilities, including but not limited to evaluating students for whom a request for an evaluation has been made. When a placement is made, the host district will ensure that the teacher providing free and appropriate public education (FAPE) is a certified special education teacher to ensure that appropriate educational programming is provided.

2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

The resident school district, where the student's parent(s) resides, has a financial obligation, a duty to cooperate regarding the transfer of records, and a role in student monitoring and educational planning. The host district is responsible for maintaining contact with the student's district of residence for the purpose of keeping the district of residence informed of its plans for educating the student as well as plans for transitioning the student back to the resident district. The Rockwood School District has and will continue to meet its obligations under Section 1306. As the district of residence, all assurances are made to participate in discharge planning meetings to ensure a successful transition back into the District.

Incarcerated Students Oversight

1. **Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?**

No

1. **Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).**

Rockwood Area School District ensures that incarcerated youth receive free appropriate public education (FAPE) services through a contractual agreement with Appalachia Intermediate Unit 08. Currently, the District does not have any identified students incarcerated. However, if an identified student would be incarcerated, IU 08 staff would be notified and appropriate services would be provided. The District would participate in the Special Education process including the IEP and NOREP development. The student would be tracked through the PIMS/PennData system.

Least Restrictive Environment

1. **Review the district's data for Least Restrictive Environment. Highlight areas of improvement.**

The Rockwood Area School District's focus is always on the Least Restrictive Environment when determining student eligibility and placements. Thorough evaluations are conducted when determining eligibility for special education services. The majority of students identified are fully included in the general education classroom with co-teaching and inclusion practices in place to support the needs of students. The speech and language therapist within the district completes RTI/MTSS speech groups to monitor speech data throughout the elementary school in the LRE. During the initial implementation, the primary focus was on reading interventions for students in grades K-3. Speech and language services focused only on Kindergarten students. More recently, integrated push-in lessons targeting students in all grades as appropriate has been introduced. As we move forward in developing the program, we have begun to target speech interventions in small group and individual lessons as well as continue push-in whole group lessons in all of our primary grades in an attempt to correct minimal speech sound errors. When the team has determined the supports provided through MTSS are not closing the gap for a student, or a parent requests an evaluation, the Speech and Language Therapist and/or the School Psychologist (based on reasons for referral and eligibility request) completes an evaluation to determine eligibility for Special Education Services. A comprehensive psychoeducational evaluation is conducted utilizing appropriate assessments and protocols necessary for determining the student's strengths and needs. For students found eligible for special education services in the category of Speech and Language, new research is showing effective results with simple drills and practice for students with only 1-2 articulation errors. The recent implementation of "Speedy Speech" is proving to provide students the supports needed to correct speech errors more quickly, resulting in less time out of the general education classroom. For example, instead of a student receiving a thirty-minute pull-out session, the Speech therapist can do three ten-minute drill sessions with a student. Ensuring students are in the Least Restrictive Environment has always been and will continue to be the primary goal of the District. In addition to Speech and Language, the percentage of students in the Supplemental category is higher than the State's average as well. However, this accounts for the majority of our students with Intellectual Disabilities who are in need of a Functional Life Skills Program. In the past, these students may have fallen in the full-time category. Students are included with the regular education students in a variety of regular educational settings while maintaining educational benefits. It is also important for the students to have opportunities that allow social interactions with their same-age peers. These experiences allow all students to be included in the general education environment to the maximum extent possible.

2. **What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?**

The Rockwood School District has implemented MTSS practices to address the academic needs of students in the Primary grades (K-3). Though the upper grades do not follow the MTSS approach, intervention supports are in place in grades 4-12. Tutoring times are provided throughout the day and after school. Additionally, teachers were provided training in a multimodal approach to teaching and learning, and methods for adapting and modifying curriculum based on individual student data. In addition to the direct teaching supports, all students have been issued a Chromebook. The Chromebooks have the ability to accommodate a variety of individual needs. For example, students who struggle with reading can utilize an app that will read the text to them. This not only supports their reading needs but also helps develop student independence. To accommodate students in need of social/emotional supports, the District's Student Assistance Program (SAP) teams evaluate individual referrals to determine the most appropriate supports. Along with the variety of staff members, the District contracts a Mental Health Counselor two days a week, and starting in the 2021-2022 school year, hired a full-time K-12 School Social Worker. The School Counselors and the School Social Worker work cooperatively to conduct student activities such as small group learning sessions, as well as 1:1 learning sessions when appropriate, to support social interactions. The Mental Health Counselor provides individual and family

counseling. During the 2023-2024 school year, utilizing grant funding from the state, the District employed two Student Support Specialist positions to support SEL programming and the development of a check-in/check-out behavioral tracking and modification system, which has shown great results in improving student behavior through the start of this school year.

3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.

The District continues to provide professional training and in-service activities to support the most recent practices for inclusion and co-teaching supports to ensure meaningful participation in the general education setting. While the District's major focus has been on these inclusionary practices, additional supplementary aids and services such as curriculum adaptations and modifications are also implemented based on individual student needs. Ongoing training is provided to enhance the educational benefit for all students. Personal Care Aides/Home Health Aides and general classroom instructional aides are also utilized to assist students in the general education classrooms. Further, as technology is coming to the forefront in education, every student in the District has been provided a Chromebook. Teachers, staff, students, and parents participated in training opportunities to maximize the efficiency of the devices. These trainings are ongoing as new technology becomes available. In the general education setting, Chromebooks are utilized to enhance teaching practices on a daily basis. For students with special education needs, the Chromebooks have proven to be a valuable tool in providing equal access. Students have a variety of applications available to them on the Chromebooks that align with the Specially Designed Instructions (SDIs) that are outlined in the IEP. Some of the common apps are text to speech (reads text aloud), speech to text (program types as a student speaks), and spell-check. The Chromebooks also provide a platform for accessing digital versions of textbooks with read aloud capabilities. Continued efforts to maximize the educational benefits for all students is a priority for the District. In addition to staff training, ongoing student and parent trainings are provided on best practices for appropriately utilizing Chromebooks to maximize the educational opportunities for all students. Many of these training sessions have been recorded and posted on individual teacher's Google classroom page and/or the District's website. Across both the elementary and middle/high school buildings in the District, special education teachers and our special education instructional paraprofessionals are utilized as co-teachers and general education supports for students who are included in general education classes, but may benefit from small group reteaching or prompting. The schedule is developed early on the school year to allow for maximum co-teaching to occur within the District.

4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.

All Supplementary Aides and Services provided to a student are determined by the IEP team, including parents, on an individual basis. The District implements practices to ensure all students are afforded the opportunity to participate in extra-curricular activities, including those with disabilities. Services provided to the student during the school day may also be extended in order for students to have the supports needed to participate in extra-curricular activities. Behavior plans are followed as appropriate, as well as the need for a Personal Care Assistant (PCA). A student may be provided modified or adapted requirements and/or equipment, and/or specialized transportation, and/or additional practice or support necessary for participation. Technological supports are also provided as needed, such as headphones with a microphone for talk-to-text features, or an iPad that can be utilized as a Assistive Technology (AT) device, when appropriate.

5. Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?

The District is committed to ensuring all students, including those placed in private institutions have the opportunity to be educated with non-disabled peers to the maximum extent possible as well as to participate in extracurricular activities. The LEA participates in all IEP meetings where programs and

services are discussed, including extracurricular activities. Efforts are made to ensure students are afforded the opportunity to participate in the general education curriculum as well as extra-curricular activities when appropriate.

6. Discuss the district’s need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)

As the District continues with the Multi-tiered system of support (MTSS) practices in the primary grades, there is a need to expand the program into other grade levels and targeted subject areas. The current focus has been on reading in grades K-3. The District is seeing a need for implementing a more structured system for data collection in the middle school grades (4-6) as well. Additionally, supports in Mathematics could provide needed interventions for struggling students. This data is a key component when conducting evaluations to determine eligibility for special education services. At the start of the 2021-22 school year, the District employed two Ameri-Corp workers in the Elementary. The primary focus of these new positions is to provide interventions to struggling students. Tutoring schedules were created throughout the school day and an after-school program was implemented. The Ameri-Corp employees are through a two-year program. At the end of the two-year program, data reviewed indicated the Ameri-Corp position was supportive of students. The district employed an Ameri-Corp student (college-level) support, along with the new Student Support Specialist (2) positions, to create and build summer and afterschool programming to support social-emotional and behavioral well-being of students through the 2022-2023 and 2023-2024 school years. In addition to the Ameri-Corp positions, the District hired a full-time social worker during the 2021-2022 school year to assist in addressing social/emotional, and behavioral concerns. In previous years, the District contracted Social Work services through the Intermediate Unit 8 two to three days a week. However, with an increase in student/family needs, the District felt taking over the position full-time would be more beneficial to students and families.

BoardDocs® PL.pdf

1. How does the district support the emotional, social needs of students with disabilities?

The Rockwood Area School District employs Positive Behavior Supports as the primary method of addressing problem behaviors as we recognize positive interactions bring about desired results more effectively than negative consequences. It is within these efforts that the district benefits from the skills of many highly trained individuals including the District's Guidance Counselors, Supervisor of Special Education/School Psychologist, Emotional and Autistic Support teachers, Superintendent, Principals, and Social Worker. For the 2023-2024 school year, two Student Support Specialist positions were also funded by the district through the use of mental health grant funds to support student behavior and social-emotional functioning. Furthermore, in addition to the Nonviolent Crisis Intervention Program provided by the IU8, the District maintains trained K-12 Student Assistance Team (SAP) personnel, a SAP liaison and a contracted Mental Health counselor, along with a representative from drug/alcohol who attends the High School SAP Meetings weekly. The many collaborative efforts of these individuals serve to focus on prevention rather than reaction, noting that it is a much more effective and positive endeavor to identify preventative methods to bring about positive behavioral results than functioning in a response to inappropriate behavior after it occurs. In conjunction with the SAP team, the District implemented a Child and Adolescent Trauma (CAT) team in the 2020-2021 school year. In response to the State's initiative, professional development was provided to all District staff members. A referral process was developed as well as a universal screener to assist with identifying students and determining appropriate treatment if necessary.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

The Rockwood Area School District provides a variety of training opportunities to staff regularly. Within the course of this plan, as in previous plans, the District will work the Intermediate Unit 8 to provide Nonviolent Crisis Intervention Strategies (NCIS), de-escalation training for the newly hired staff members, as well as a refresher course for those who have had the training the past. Additionally, the School Psychologist, School Counselors, and School Social Worker, along with Intermediate Unit 8 (IU08) representatives, continue to facilitate training and disseminate literature and web-based resources related to positive behavior supports.

3. Describe the district positive school wide support programs.

Positive behavioral functioning is monitored and rewarded through various incentive programs that are offered throughout the school year; some of which include, but are not limited to, school amusement park trips, school-day special events, tangible rewards, reward programs such as movie days, holiday fun days and an end-of-year outdoor carnival. The Elementary has a school-wide "Leaders of Tomorrow" program where teachers and adult staff members can present students with a positive "citation" when they are found to be doing something positive, such as helping someone in need or improving on their own areas of need. When a student is awarded a citation, they earn a 'RocketBuck.' At the end of each nine-week marking period, students can choose from a

cart of incentives and/or cash-in their RocketBucks for larger school events. In addition to these reoccurring events, the District provides yearly assembly programs with guest speakers or presenters who encourage positive behaviors.

4. **Describe the district school-based behavior health services.**

The district employs the skills of many highly trained individuals including the District's Guidance Counselors, School Psychologist, Emotional and Autistic Support staff members, Superintendent, Principals, Supervisor of Special Education, and K-12 School Social Worker. In addition to district-employed personnel, the District also contracts a Mental Health Counselor two days per week throughout the school year and as needed during the summer months. For the 2023-2024 school year, two Student Support Specialist positions were also funded by the district through the use of mental health grant funds to support student behavior and social-emotional functioning.

5. **Describe the district restraint procedure.**

Rockwood Area School District's Positive Behavioral Support Policy clearly stipulates that positive rather than negative measures form the basis of behavior support programming in recognition that positive research-based techniques foster the development of appropriate behavioral functioning. This policy clearly outlines that aversive techniques serve no purpose but to demean rather than support positive behavioral functioning. Also contained in the policy is the stipulation that restraints can only be used to "control acute or episodic aggressive behavior when the student is acting in a manner that presents a clear and present danger to the student, other students or employees, and only when less restrictive measures and techniques have proven to be or are less effective." In the event that a student's IEP would include the use of restraints, the description of this process would be in accordance with the Rockwood Area School District's Positive Behavior Support (PBS) Policy which states that any type of behavioral intervention should be of the least intrusive necessary as stated above. The policy focuses on positive behavioral programming as the basis for behavior support interventions and must include a variety of research-based methods which emphasize positive, rather than aversive techniques. Positive Behavior Support Plans (PBSP) identify socially acceptable alternative skills for the purpose of instruction and, if necessitated, would indicate relevant and specific use of restraints as warranted and in accordance with required regulatory components. The Rockwood Area School District has a team of trained K-12 individuals who have received Nonviolent Crisis Intervention Strategies (NCIS) and serve on an "on-call" basis should an immediate need be presented which requires de-escalation behavioral techniques and/or emergency response. School staff has been trained regarding verbal de-escalation techniques and noninvasive ways to remedy potentially volatile behavioral situations. The School Administrators take part in recertification NCIS training. In the event that an IEP and PBSP would stipulate the use of restraints, they would also include a goal for how to eliminate the use of restraints and implement a goal for developing positive and independent behavioral functioning. The Rockwood Area School District abides by the law and regulatory components, as stipulated in our school board-approved policy, regarding prone restraints which are clearly prohibited and never used. In the event that a student would be referred to law enforcement, an IEP meeting would be held, a Functional Behavioral Assessment (FBA) would be either developed or reviewed, and a PBSP developed or revised by the IEP team as indicated. It should also be noted that the District has not had any restraints in the past 7 years.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

Currently, the District does not have any students who are in need of receiving Instruction Conducted in the Home or waiting for an appropriate educational placement. However, the District continues to maintain partnerships with neighboring schools to match hard to place students with programs necessary to provide education benefit. The District continues to consult with the Intermediate Unit 8 to assist with program placements and /or to provide the supports necessary to meet low incidence student needs. The District also continues a working relationship with the Children's Aid Home Day Treatment Program in Somerset, Children's Behavioral Health Partial Program in Somerset, New Directions Partial Program in Uniontown, Somerset Area School District Emotional Support Classroom, and Pressley Ridge Day School in Johnstown. Additionally, students with health concerns that prevent them from attending in-person learning have been able to utilize the District's online platform to access live classes with regular and special education teachers necessary for ensuring FAPE.

- x There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- x The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- x The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- x The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- x The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- x The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.

Superintendent/Chief Executive Officer
